

Fleets Leading Advanced
Clean Transportation

Participation Information & Benefits

A Members-Only Educational Network

WWW.ACTFLEETFORUM.COM

Managed by:

In Partnership with:

The ACT Fleet Forum brings together leading fleets who use advanced, clean technologies. Members learn from each other and exclusive technology previews via web discussions and workshops.

MEMBERS JOIN REGULAR DISCUSSIONS WITH THESE LEADING FLEETS:

...AND MORE LIKE YOU JOINING EVERY DAY.

WHO BENEFITS FROM ACT FLEET FORUM:

Chief Technology Officers, Chief Operating Officers, Fleet Managers, Maintenance Managers, Sustainability Teams, Innovation Leaders, Fleet Service Teams, etc.

More than 70 percent of representatives are Director or above.

HOW FLEETS BENEFIT:

Regular Best Practices Discussions

Discussion with fleets who have integrated the latest clean and advanced technologies. Minimum six (6) web discussions on cutting edge topics. Regular best practice sharing discussions on EV and Natural Gas.

Hands-on Workshops

Exclusive visits or virtual events of fleet and vendor facilities to see the first deployments of cutting-edge advanced clean vehicle technologies.

Complimentary ACT Expo Participation

Passes to join nearly 1,000 fleet managers and thousands of industry experts at the largest clean fleet event in North America.

Regulatory and Funding Updates

Regular updates on policies impacting fleets and funding opportunities to adopt clean technology. Access to GNA policy and funding experts for Q&A.

24/7 Access to Lessons Learned

Exclusive access to recordings, briefs on lessons learned, and slides from all previous discussions and workshops. Includes schedule of upcoming discussions to share with colleagues.

HIGHLIGHTS FROM 2019 – 2021

Lessons and tech preview discussions on:

Total Cost of Ownership (TCO) ● MHD Electric Vehicles
Predictive Maintenance ● Utility Charging Programs
AFV End of Life ● CARB's New ACT Rule
State of Fuel Cells ● CNG Best Practice ● Using RNG
California's Low Carbon Fuel Standard (LCFS)
Microgrid Projects ● Charging Management Best Practice
Nikola's Fuel Cell Technology ● Megawatt Charging Standard
Public Fast Charging

As an ACT Fleet Forum member, you can search a library of all past and future slides, briefs, and recordings on these topics.

2021 DISCUSSIONS AND WORKSHOPS

Regular best practice discussions on EVs and CNG, plus these workshops and discussions to preview cutting edge technology:

Workshop: PepsiCo's Near-Zero Emission Facility

Visit one of the country's first near-zero fleet facilities with technologies from Tesla, BYD, ChargePoint, and more.

Workshop: Making BEVs Work Outside of California

Visit fleets in New Jersey who have deployed charging and battery electric vehicles for MD and HD applications.

Workshop: First Fuel Cell Electric Vehicle Deployments

Join the first fleets to pilot hydrogen and their technology partners to understand its performance and state of development.

Markets for Battery Resale, Rescue, Recycling

Discuss current and developing resale opportunities for vehicle batteries with a leading reseller and fleets with experience in battery recycling.

Using Renewable Diesel When Clean Fuel Vehicles Won't Work

Discuss with current users and providers of renewable diesel on its performance and ways to procure it cost effectively around North America.

Inductive Charging: Where it's Viable Today.

Learn from charging technology developers and users on the current state of inductive charging and results from first installations.

Making Microgrids Work: Update from Early Adopters

See how leading fleets are using onsite storage and electricity generation to reduce charging costs and increase fleet resilience.

Reality of Renewable Hydrogen Today and Tomorrow

Talk with leading developers of renewable hydrogen and fleet customers on the state and future of this technology.

Electric TRU's

Hear why eTRU's are developing so rapidly and what results fleets are seeing with their pilots.

No limit on staff participation by member fleets in discussions, technology previews, funding and policy updates. Workshops subject to fleet demand, travel authorization, and supplier sponsorship.

AUTHORIZED SIGNATURE

Join other leading fleets who use advanced technology to discuss, see, touch, learn, and preview technology. Fleets who participate agree to showcase their own lessons from implementing advanced clean technology projects, actively engage in facilitated discussions, and recommend future topics. Membership recurs annually, cancel any time.
